PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in full-stack web application development using Java, Spring Boot, React.js, PostgreSQL, and REST APIs. Familiar with developing web applications, relational databases, object-oriented programming, and debugging. Strong interest in building practical software solutions and applying technical skills to real-world development projects.

TECHNICAL SKILLS

Programming Languages: Java, C++

Web Technologies: HTML5, CSS3, JavaScript, AngularJS

Backend Technologies: Spring Boot, Java Servlets, Hibernate, REST APIs

Database: MySQL, PostgreSQL

Tools: Eclipse IDE, XAMPP, Visual Studio, Postman

Concepts: Object-Oriented Programming (OOP), Web Application Development, debugging

Libraries: Apache POI, Chart.js, Recharts

INTERNSHIP EXPERIENCE:

Techspiration India Pvt Ltd | Full-Stack Developer Intern | Feb 2026

- Developed an AI-powered system to evaluate answer sheets using OCR (Tesseract) for text extraction and OpenCV for image preprocessing.
- Implemented LLM (Ollama) and cosine similarity techniques to automatically generate scores and feedback based on student answers.
- Built a full-stack application using Java Spring Boot, React.js, and PostgreSQL, enabling efficient and automated answer evaluation.

EDUCATION

Bachelors in Computer Applications

Govt First Grade College, Kolar

CGPA: 8.99 | 2021-2024

Masters in Computer Applications

Sri Venkateshwara College of Engineering, Bangalore

CGPA: 8.6 | 2024-2026

PROJECTS:

Carbon Emission Calculator (Web Application)

GitHub: <https://github.com/arunkumar3333/java-carbon-emission-calculator>

Technologies: Java Servlets, Hibernate, MySQL, AngularJS, HTML, CSS, JavaScript, Apache POI, Chart.js

- Developed a full-stack web application to calculate and monitor carbon emissions from transportation data.
- Implemented user authentication (registration, login, logout) using Java Servlets and session management.
- Built an interactive dashboard displaying emission statistics using Chart.js.
- Implemented Excel file upload processing using Apache POI to calculate CO2 emissions automatically.
- Designed and optimized MySQL relational database schema for activity and emission records.

CERTIFICATIONS:

- Full Stack Web Development Workshop (1-week intensive program)
- Java Foundation Certification (Infosys | Springboard)
